Safe Technology Utilization & Digital Citizenship Report

Guest Presenter from District DT& L—Alan Reese

What is the district technology department doing to help keep students safe?
-Web Filtering in 2 ways iboss & Bark
-We are not doing a very good job sharing Bark with parents, we could do better with this.

Nearpod platform
-has grade specific resources to help teach students about online safety.
-Nearpod has teamed up with www.commonsense,org to help bring these lessons to students.

Real Time Monitoring
-At the beginning of November the technology department and their teams will begin meeting to discuss the two Software applications options on the table that Teachers/Staff will have to monitor students computer screens while they are on them. Those options are **Go Guardian** and **Bloxie**.

Trust lands Plan Update

Our School wide goal: *Based on Pathways to Progress schoolwide data, 60% or more of our K-6 students will show typical, above, or well above progress on end of year Acadience Assessment.*

How we plan to make it happen:

-We are using 95% group (Small group program) to help fill in the holes. Due to the fact that more grades are using this program this year we have found we needed to purchase more materials. Therefore expenditures are more than we had previously anticipated, it has cost approximately $2,500 more than planned.

Title One Plan Update

We are focusing on our behaviors. Our positives are still really high. However, our majors and minor infractions are being reported more consistently. Which gives us more accurate data.
